

Designing Your Perfect Photobooth Prints

Technical Specifications

For designing photobooth prints, you need to consider technical specifications to ensure optimal print quality:

General Guidelines:

- ▶ Resolution: 300 DPI (dots per inch)
- ▶ Color Mode: CMYK
- ▶ File Format: PDF (preferred), JPEG or PNG

Print Sizes:

1. 6x2 inch | Dimensions in pixels: 1800 x 600 pixels
2. 6x4 inch | Dimensions in pixels: 1800 x 1200 pixels

Design Considerations:

- ▶ Bleed: It's advisable to include a 3mm bleed around your design to ensure there are no white edges after trimming.
- ▶ Safe Zone: Keep important elements (text, logos, etc.) at least 5mm away from the edge to avoid cutting them off.
- ▶ Color Profiles: Use CMYK color profile for more accurate color representation when printed.

Summary:

- ▶ 6x2 inch: 1800 x 600 pixels
- ▶ 6x4 inch: 1800 x 1200 pixels
- ▶ Resolution: 300 DPI
- ▶ Color Mode: CMYK
- ▶ File Format: PDF, JPEG or PNG
- ▶ Bleed: 3mm
- ▶ Safe Zone: 5mm from the edge

These specifications will help you create high-quality photobooth prints that align perfectly with our Photobooth printer's capabilities.
